

PROFILE

Electrical & Electronic Engineering student and applied AI developer, currently in Year 2 of a BEng at Manchester Metropolitan University. I enjoy building AI tools and applying them to real engineering problems — pairing hands-on engineering experience with full stack software and large language model (LLM) integration. Alongside my studies I've designed and deployed my own AI applications and gained real on-site experience to understand all the layers of business, from the tools on the floor to the people in the offices.

I also enjoy sports, playing football my whole life and going to the gym 5 times a week.

CAMERON CONLAN

TECHNICAL SKILLS

- **AI & Software:** Anthropic (Claude), API integration, LLM application development, prompt engineering, Node.js, PostgreSQL, JavaScript, full stack builds and deployment (Railway), GitHub
- **Engineering:** IoT and sensor integration, instrumentation basics, electrical and electronic engineering principles, Multisim, Quartus
- **Other:** CCNSG National Safety Passport (ECITB), full clean driving licence and car owner

PROJECTS

Tendra (2026 – present)

Developer of an AI-powered tool that turns clients' ITT and RFQ documents into drafted engineering tender and quotation responses. Built the full stack:

- Wired the Anthropic (Claude) API into a Node.js / Express backend with a PostgreSQL database to generate structured documents from unstructured PDF / DOCX inputs.
- Built client-facing and admin web portals, a background processing worker, session management and automated email flows.
- Wrote a Puppeteer web scraper to build and clean a ~2,000-company dataset, and configured domain, DNS and business email infrastructure.

Smart Wearable Monitoring System – University Group Design Project (2026)

Wearable IoT monitoring system integrating sensors, LoRa and GPS into a physical garment to capture and transmit live player data.

WORK EXPERIENCE

Allied Protek Engineering Solutions, Grimsby

Student Engineer (May 2025 – August 2025)

Working with the installation teams at client sites, based away from 'home'. Worked within the Kellogg's Manufacturing facility Manchester, supporting the removal of a packaging line for reinstatement at the Wrexham facility. Tasks included skidding machinery, manual handling, and disassembly. Worked at Mars, Slough facility, on various projects supporting the tradesmen, including fire watch, disassembly, assembly, and movement of equipment.

Student Design Engineer (Aug 2024 – Sept 2024)

Working through the summer period within the design office, learning how AutoCAD and SolidWorks are used within a design environment centred around structural steel and piping design. Attended the VEGA instrumentation truck to learn about instrumentation, including different level devices, tuning forks, and wave transmitters.

EJ Parkers, Louth

Internship (June 2023 – August 2023)

Supported the designers in learning how to design basic Fire & Gas detection systems, and the selection of devices for the tasks and zones they were installed within. Also attended site with the electrical installation team to broaden experience and exposure to various sites.

Youngs Seafood, Grimsby

Factory Operative (November 2022 – April 2023)

Worked part time as an operative at the Humberston Road facility on the 6am–2pm shift. Duties were varied, including packing, stacking and preparation of packaging materials needed for the final product.

EDUCATION & TRAINING

Manchester Metropolitan University, September 2024 – present

Bachelor of Engineering, Electrical and Electronic Engineering, Year 2. On track for a First.

Franklin College, Grimsby, 2022–24

A-Level Mathematics (C), Business Studies (B) and Economics (C)

Healing Secondary School, Grimsby, 2017–22

8 GCSEs including English, Maths and Science
BTEC ICT

CCNSG National Safety Passport – Delivered by ECITB, June 2025

Nationally recognised safety card for the UK engineering construction industry, providing best-practice health and safety accreditation — valid for three years.

Institution of Engineering & Technology, Student Member, September 2024 – present

INTERESTS / HOBBIES / OTHER

Captain/manager of a university football team I established. Keen interest in football and football statistics. Actively follow developments in AI and how they can be applied to engineering. Train in the gym five times a week. Competed in Greenpower Formula 24, qualifying for the international finals at Silverstone. Also interested in investing.
